

# Snowy River

## Reverse Osmosis Undersink Water Filter System

### For Effective Removal of Fluoride .....

as well as a range of other contaminants which can occur in mains water supplies such as

- Sediment
- Dirt & Rust
- Chlorine
- Taste & Odour
- Giardia & Cryptosporidium
- Heavy Metals

For the ultimate in water filtration the Snowy River System represents great value for money. With filtered water costs as low as a few cents per litre, end users are assured of high quality, pure drinking water.

All Snowy River Undersink Systems feature:-

- High Capacity prefilter cartridges & membrane for long filter life and exceptional system economics.
- A complete filter assembly which includes all necessary plumbing components & fittings, together with a highly durable water storage tank, everything required for installation.
- Compact design which is easy and simple to install and maintain.
